Office Action Summary

Art Unit: 3739

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22-48 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Zeimer (US '942).

Zeimer (US '942) teaches using indocyanine green to locate and coagulate a feeder vessel and then to coagulate the CNV associated with macular degeneration that exists downstream of the feeder. The use of fluorescence to examine vasculature and recording the retinal images is also taught.
